Research Associate – Proteomics

The team at IQ Proteomics is seeking an enthusiastic Research Associate to prepare samples for mass spectrometry-based proteomic experiments which will support our contract research operations. The position requires the candidate to have some biochemical laboratory experience and the desire to learn high-throughput biochemical approaches for proteomics. The ideal candidate will be an excellent team player, able to thrive in a dynamic environment with tight deadlines, and possess a diverse set of skills in protein biochemistry.

How you will spend your day:

- Follow standard operating procedures to prepare cells, tissues, biofluids, and proteins for quantitative mass spectrometry
- Generate, analyze, and interpret data using commercial and proprietary software
- Take detailed notes and observations and document them in electronic notebooks
- Participate in and contribute to scientific discussions and meetings
- Be able to simultaneously work on multiple projects with tight deadlines
- Partner and collaborate with the entire team at IQ Proteomics

What you will bring to the table:

- B.S./M.S. degree in life sciences with at least 1+ years of experience in an academic or industrial setting
- Relevant experience includes protein chemistry, biochemistry, chemistry, analytical chemistry, biophysics, chemical biology, proteomics, mass spectrometry
- Hands-on experience with mass spectrometry-based proteomics is a plus
- Detailed oriented, with an emphasis on organization and note-taking
- Enthusiasm for working at the forefront of proteomics research
- Can work independently and possess the interpersonal skills to work with a tight-knit group
- Ability to communicate ideas (verbally and written), be organized and ask questions

About IQ Proteomics:

IQ Proteomics was founded in 2015 with a goal to support the biotech and pharmaceutical community by providing unparalleled proteome characterization and to develop next-generation technologies. Employees have the opportunity to work closely with and receive training from our founders, who bring to the table over 25 years of experience at the forefront of proteomics research.

Located in Cambridge, MA our laboratory is conveniently within walking distance to Central Square.

IQ Proteomics is an Equal Opportunity Employer and provides a competitive salary, a comprehensive benefits package, including health, dental, paid vacation, and commuter reimbursement.
